PROFESSIONAL PROFILE

Systems Analyst and Computer Systems Engineering graduate with hands-on experience across business analysis, software development, system testing, data analysis and IT support. Comfortable moving between stakeholders and technical teams: gathering and documenting requirements, building and testing solutions, and keeping systems stable in production. Proficient in Python, SQL, PHP/Laravel and Flask, with working knowledge of Microsoft Azure, Microsoft 365 and networking (Cisco CCNA).

PROFESSIONAL EXPERIENCE

Systems Analyst · Icebolethu Group — Jul 2026 – Present

- Gather and document business requirements, translating stakeholder needs into clear technical specifications.
- Conduct business analysis of processes and systems to identify gaps and recommend improvements.
- Contribute to software development, building and enhancing features to meet business requirements.
- Carry out system testing to verify functionality and catch defects before and after changes are deployed.
- Perform system maintenance to keep business systems stable, up to date and reliable.

ATM Automation Technician · Diebold Nixdorf — Feb 2026

- Configured and calibrated ATM cash cassettes to ensure accurate dispensing and minimise transaction errors.
- Installed and replaced ATM hardware including card readers, cash dispensers and internal peripherals.
- Ran system diagnostics, software testing and preventive maintenance to reduce downtime, escalating complex faults.
- Followed operational and security standards when handling ATM systems.

Work Integrated Learning Intern · Moepi Publishing — Aug 2025 – Jan 2026

- Rotated across IT Support, Junior Software Development and Data Science teams.
- Provided end-user support for hardware, software and network issues; installed and configured workstations and peripherals.
- Helped develop, debug, test and deploy web applications to improve performance and usability.
- Cleaned, transformed and analysed data with Python and Excel, producing reports and visualisations.
- Used Microsoft Azure and cPanel for deployment, hosting, domain and database administration; documented technical processes.

IT Support Specialist – Full-Stack Development & Data Support · PMNK Holdings — Apr 2023 – Apr 2025

- Delivered first-line support for hardware, software and network issues; maintained Windows and Linux environments.
- Administered Microsoft 365 (users, email, Teams, access control) and supported Azure-based services.
- Built and maintained internal web applications with HTML, CSS, JavaScript, PHP and Laravel, plus Python/Flask automation and integrations.
- Managed SQL databases and produced Excel and Power BI reports to support business decisions.
- Managed Afrihost hosting, domains and website deployments; performed root-cause analysis and kept technical documentation current.

EDUCATION & CERTIFICATIONS

Diploma in Electrical Engineering – Computer Systems
Vaal University of Technology · 2021 – 2025

Cisco CCNA
Introduction to Networks · Switching, Routing & Wireless Essentials · Enterprise Networking, Security & Automation

TECHNICAL SKILLS

Analysis & Testing	Business analysis, requirements documentation, system testing, debugging, SDLC, technical documentation
Programming	Python, JavaScript, PHP, Java, C/C++, HTML, CSS
Frameworks	Flask, Laravel, Django, React, Node.js / Express, Bootstrap, REST APIs
Data & Databases	SQL, MySQL, SQLite, database design, data cleaning & EDA, Excel (pivot tables), Power BI, Jupyter
Cloud & Hosting	Microsoft Azure, AWS, Microsoft 365 administration, Afrihost, cPanel
Systems & Networking	Windows, Linux, LAN / Wi-Fi, IP addressing, network security, hardware troubleshooting, Git / GitHub

PROJECTS

Icebolethu Supplier Portal
Icebolethu Group
Portal for suppliers to register and maintain company details and compliance documents, with staff review, approval and central supplier management.

Icebolethu Funeral Administration System
Icebolethu Group
End-to-end funeral case management: deceased and family details, service scheduling, resource allocation and case tracking.

Leave Management System
Python, Flask, SQLite, Bootstrap
Online leave applications with admin approval workflow, day tracking and leave history.

Icebolethu Premium Collection
Icebolethu Group
Collects and reconciles policy premiums, matching payments to policies and flagging missed or outstanding payments.

ICE Claims System
Icebolethu Group
Captures claims and tracks each one from submission through assessment to payout, keeping supporting documents and status history together.

Icebolethu Policy Administration System
Icebolethu Group
Manages policies across their lifecycle, from member and beneficiary onboarding to policy changes and status tracking.

Work Integrated Learning Check-In System
Python, Flask, MySQL, Bootstrap
Attendance, logbook and timesheet platform for students, mentors, coordinators and MICTSETA staff, with real-time analytics dashboards.

Kings Trip Travel Website
HTML, CSS, Bootstrap, JavaScript · kingstrip.co.za
Responsive live website for a travel agency showcasing packages and taking booking inquiries.
